SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

- (1) *Type of Information Collection:* Reinstatement of the Supplemental Victimization Survey (SVS), with changes, a previously approved collection for which approval has expired.
- (2) *Title of the Form/Collection:* 2016 Supplemental Victimization Survey (SVS)
- (3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* The form number for the questionnaire is SVS-1. The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.
- (4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Respondents will be persons 16 years or older living in households located throughout the United States sampled for the National Crime Victimization Survey (NCVS). The SVS will be conducted as a supplement to the NCVS in all sample households for a six (6) month period. The SVS is primarily an effort to measure the prevalence of stalking victimization among persons, the types of stalking victimization

experienced, the characteristics of stalking victims, the nature and consequences of stalking victimization, and patterns of reporting to the police. BJS plans to publish this information in reports and reference it when responding to queries from the U.S. Congress, Executive Office of the President, the U.S. Supreme Court, state officials, international organizations, researchers, students, the media, and others interested in criminal justices statistics.

- (5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimate of the total number of respondents is 111,960. About 98.5% (110,280) will have no stalking victimization and will complete the short interview with an average burden of four (4) minutes. Among the 1.5% of respondents (1,679) who experience stalking victimization, the time to ask the detailed questions regarding the aspects of their stalking victimization is estimated to take an average of 12.25 minutes. Respondents will be asked to respond to this survey only once during the six month period. The burden estimates are based on data from the prior administration of the SVS.
- (6) *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 8,055 total burden hours associated with this collection.
